APPLICATION FOR ENTRY-LEVEL SOFTWARE ENGINEER / DEVELOPER ROLE

Dear Hiring Manager,

I am writing to express my strong enthusiasm for the Software Engineer / Developer position at [Associated Pearson Office](#). As a Computer Science graduate from Government Engineering College with a strong academic standing (CGPA: 8.6/10) and hands-on expertise across Core Java backend development, JDBC, Spring Core, and modern React.js frontend interfaces, I am eager to contribute to your engineering team.

During my academic tenure and technical training at Xworkz Bengaluru, I gained practical proficiency in designing robust object-oriented architectures, implementing multi-threaded routines, and building reliable database-driven systems using JDBC. In parallel, my frontend development skills enable me to bridge client-facing interactions with high-performance backend logic seamlessly.

Full-Stack Project Leadership

Spearheaded the AI-powered career growth platform from a 1st-place hackathon concept to complete final-year delivery, engineering modular React.js UI and reliable data flows.

Core Java & System Design

Proficient in OOP principles, Collections framework, Exception Handling, multithreading, and Spring Core Dependency Injection for maintainable codebases.

Interactive Web Engineering

Developed an end-to-end Smart Metro application featuring dynamic route finding, live fare calculation algorithms, and secure multi-page authentication flows.

Hackathon-Validated Problem Solving

Secured 1st and 2nd prizes in competitive college hackathons and received recognition at HackSprint for clean UI/UX and rapid software prototyping.

Beyond technical competencies, my training with Seventh Sense Company has honed my communication, quantitative aptitude, and collaborative problem-solving skills. I thrive in collaborative environments that demand quick learning, code quality, and active ownership of deliverables.

I am genuinely excited about the prospect of bringing my dedication, foundational engineering skillset, and problem-solving mindset to [Associated Pearson Office](#). Thank you for your time and consideration. I welcome the opportunity to discuss how my background aligns with your project requirements in an interview.

Sincerely,

Shashank K
